Education

2005 -   2010 Mechanical Engineering, KTH - Royal Institute of Technology.

2002 -   2005 Natural Science, Mathematics & Computer Science, Huddingegymnasiet.

Work Experience

Jun 2016 -   System Developer, Team Lead - TriOptima

                  I currently work as Team Lead for a team developing and maintaining an app
                  in the financial sector aimed at big banks. The application iself is built
                  using a micro-services architecture running various python frameworks, for
                  example Flask and FastAPI. The frontends are mostly built with React/Redux
                  in TypeScript. The services are deployed using Kubernetes with docker in a
                  self-hosted cloud environment.

Oct 2015 - Jun 2016 System Developer - FEO Media

                  Developed the backend for FEO Media's new, and yet unreleased, mobile game
                  using Google App Engine. I also helped out with maintaining the Quizkampen
                  backend.

Jun 2014 - Oct 2015 System Developer, Tech Lead - Eniro

                  Maintained and managed the CRM application I built as a consultant as well
                  as the cloud based billing platform, Aria. My role was in the IT Architect
                  team, working with tasks such as system design, app support, scrum master,
                  development and maintenance.

Dec 2011 - Jun 2014 System Developer, Consultant - Redpill Linpro

                  Developed and designed SugarCRM (PHP, MySQL) as a consultant, most of the
                  time for Eniro.

Oct 2011 - Dec 2011 Web Developer - Schibstedt (Lendo)

                  Developed the admin interface for Lendo.se and Suredo.se, two sites built
                  in PHP using Zend Framework on top of MySQL.

Nov 2010 - Oct 2011 Web Developer - Produktion 203

                  Developed homepages, mostly as a part of a team. The tech stack of choice
                  was CodeIgniter and MySQL.

2001 -   2009 Consultant - Pythagoras (extra while studying)

                  Data entry of CAD data into Pythagoras' proprietary Facilities Management
                  system, web design, programming, translation.

Languages

        Swedish Native
        English Fluent
      Norwegian Good
         German Basic

Technologies (in no particular order)

                  Linux, OS X, vim, Python, flask, JavaScript, git, bash, Kubernetes, ssh,
                  MySQL, Cassandra, RabbitMQ, TypeScript, React, Go, docker

Misc.

                  I'm born and raised in Stockholm. Apart from technology, in my free time
                  I enjoy playing my guitar, climbing, skiing, traveling, mountain-biking,
                  camping. I am also a big sports fan.
